## Executives from the flexible packaging industry get together in Düsseldorf in May 2023

### **Registration for 3<sup>rd</sup> Global Flexible Packaging Executive Forum at interpack now open!**

The third Global Flexible Packaging Executive Forum, organized by Flexible Packaging Europe (FPE) and hosted by Messe Düsseldorf, will take place at interpack on 5 May 2023.

Following the success of the first two Forums, the event has become a major fixture in the calendar during the interpack exhibition and provides an opportunity for executives from flexible packaging companies worldwide to exchange ideas and discuss innovation, new technologies, trends and the challenges facing the industry while networking with other leading decision makers in the sector. Last time the event attracted more than 120 delegates from over 65 companies, spanning five continents.

“With the challenges facing the sector regarding recyclability, packaging waste, general sustainability issues as well as rising raw material and energy prices this type of Forum is imperative to ensure we are communicating closely to address them. interpack is a great event where senior executives will attend. It makes perfect sense to use this opportunity again to continue the dialogue,” said FPE Chair Jakob A. Mosser.

Co-sponsored by Henkel and Siegwirk, the Global Flexible Packaging Executive Forum is an invitation-only event. Those flexible packaging manufacturers interested in participating should contact the FPE Secretariat ([enquiries@flexpack-europe.org](mailto:enquiries@flexpack-europe.org)) or register online at: [executiveforum.flexpack-europe.org](http://executiveforum.flexpack-europe.org).

#### **About Flexible Packaging Europe**

*Flexible Packaging Europe (FPE) is the industry association representing the interests of more than 80 small, medium-sized companies, and multinational manufacturers. Those operate with workforce of 57,000+ people at more than 350 sites all over Europe. The member companies account for more than 85% of European sales of flexible packaging made of different materials, mainly plastics, aluminium, and paper. More than half of all food products sold on the European retail markets are packed with flexible packaging. More info at [www.flexpack-europe.org](http://www.flexpack-europe.org)*
